KELTRON has proudly partnered ISRO right from the early SLV/ASLV Missions, the successful PSLV and GSLV Launch Vehicles, and the historic CHANDRAYAN Missions upto the present time through the development of the heavy GSLV Mark III to launch the 4tonne satellites into the geostationary transfer orbits.

KELTRON'S contribution is present in all the critical sub-assemblies and their testing which includes Launch Vehicle Navigation and Guidance Computers, Stage Processing Modules, Control Electronics Modules, Inertial Sensing Unit's Power Modules, DC-DC converters, Resin electronic module, to mention a few. The participation extends to the family of ISRO satellites as well.
