

ORGANIZATION – in Brief

Kerala State Electronics Development Corporation Limited (KELTRON), established under the Companies Act of 1956, is a fully government-owned enterprise under the aegis of the Government of Kerala. The KELTRON Group comprises the parent company, Kerala State Electronics Development Corporation Limited, and its two subsidiaries, Keltron Component Complex Ltd. and Keltron Electro Ceramics Ltd. Together, these entities manufacture over a hundred distinct products, each reflecting the company's commitment to quality and innovation. These products are distributed across the nation through a robust sales and distribution network, strategically supported by six branch offices located in New Delhi, Ahmedabad, Kolkata, Mumbai, Bangalore, and Chennai. This extensive network ensures that KELTRON's offerings are consistently accompanied by dedicated customer support and service.

Over the years KELTRON has accomplished much more than what is set out to achieve; to industrialise a virgin territory and to provide employment opportunities to the teeming millions. It pioneered new concepts in industry and management, and created many products for the first time in the country. KELTRON has not only changed the industrial profile of the Kerala State but has even transformed the lifestyles of its people. Trivandrum, the corporate headquarters of KELTRON once a placid town, is now a sophisticated city humming along with the highest in Quality of Life Index. More than offering employment opportunities to the people, Keltron has trained and nurtured many high calibre managers and technical hands who have in turn enlarged the horizons of a developmental process that it had initiated years ago.

Today, KELTRON products remain as icons of technology brought to benefit the people. As diverse as its products and their uses are, they are unified by its pivotal strength as a solutions provider. It is this philosophy that has made KELTRON a vital contributor to the changing needs of the world and the community to which it belongs to, during the last quarter century. From within the four walls of your drawing room to the vast expanse of an international airport, from the deep oceans to the realms of outer space, there is a KELTRON product in the form of an innovative solution. Continuing in its quest to bring the benefits of frontier technology to its customers, KELTRON has forged strategic alliances with major institutions in India. Its focus today is in adapting technology to fulfil the needs of its customers with a renewal mission to emerge as a provider of better solutions for the future.

Keltron is a technology driven enterprise that manufactures and markets electronic components, equipment and systems for communications, defence, industrial and home applications. Coupled with the high-calibre technical expertise available in house, KELTRON has repositioned itself as a total solutions provider in Electronics and Information Technology. The current capabilities of the Company include system integration, project management services and consultancy. Nearly 4000 employees working in different part of the country are focused on bringing the benefits of technology to the customers. In some cases, it involves designing entirely new products and in others, adapting available technology to evolve better solutions.

What sets a customer-oriented company like KELTRON apart is its profound ability to empathize with its customers, understanding not only the challenges they face but also envisioning forward-thinking solutions. In an era where technology continually offers an expanding array of choices, the real value lies in the ability to make informed decisions—decisions rooted in deep knowledge, hands-on experience, and technical expertise. KELTRON's strength is drawn from over half a century of experience, a wealth of expertise, and a robust knowledge base, all meticulously crafted to deliver the most appropriate solutions for its customers.

KELTRON's unwavering commitment to quality, a legacy inherited from its inception in 1973, has earned the company numerous accolades. This dedication to excellence is reflected in its expansive presence, which spans from the production of electronic components to the development of complex devices and systems. These sophisticated solutions are integral to the nation's most prestigious defense and aerospace projects, underscoring KELTRON's vital role in advancing technological innovation and national security.
